

Project 3 Approval

开始任务

- 截止 星期五 由 16:00 编辑
- 得分 20
- 提交 网站 URL
- 可用 6月20日 2:59 之后

Let's use this assignment for checking that you get your P3 approved on time.

- You cannot iterate over your P2, and you can choose different teams if you want.
 - We will be using the same architecture of P2 but changing the Frontend to Client side rendering React
 - **You need** to work in pairs. Please respond to this thread with your name if you want me to assign you a teammate. Please make sure to create your group on canvas. You are supposed to be able to assign yourselves to a group.
 - If you need a teammate please post on #project.
 - **You need** to propose a project posting on **#project** [↗\(https://webdev-online-neu.slack.com/archives/C09D5UFRT2R\)](https://webdev-online-neu.slack.com/archives/C09D5UFRT2R).
 - Add the string **[ProjectProposal]** and tag me so I can approve it. It must be approved one week before the deadline.
 - Give me a short project description, and a small number of independent user stories that you are planning to implement. Remember what I did on <https://www.youtube.com/watch?v=GqW1K1jHJCc&list=PLmRfPZr9-VoHJ6K1g3URENMAVYPXCQFyw&index=30> [↗\(https://www.youtube.com/watch?v=GqW1K1jHJCc&list=PLmRfPZr9-VoHJ6K1g3URENMAVYPXCQFyw&index=30\)](https://www.youtube.com/watch?v=GqW1K1jHJCc&list=PLmRfPZr9-VoHJ6K1g3URENMAVYPXCQFyw&index=30)
- 
- <https://www.youtube.com/watch?v=GqW1K1jHJCc&list=PLmRfPZr9-VoHJ6K1g3URENMAVYPXCQFyw&index=30>
- ?
- Tell me who will be implementing what. The user stories must be completely independent. Also remember that each one of you must implement the full stack of your user stories. No back vs front job splitting.
 - You must use the architecture I described in the videos. Node + Express + Front end rendering React with Hooks + Mongo (NodeJS driver). **You cannot use Mongoose on this project.** Please ask me beforehand for any library you want to use.
 - Avoid using GenAI for building the whole application, you won't learn anything and it will probably show by the resulting code and look and feel. Remember to disclose any usage of AI on your project.

- Please make sure to check the rubric so you don't miss anything

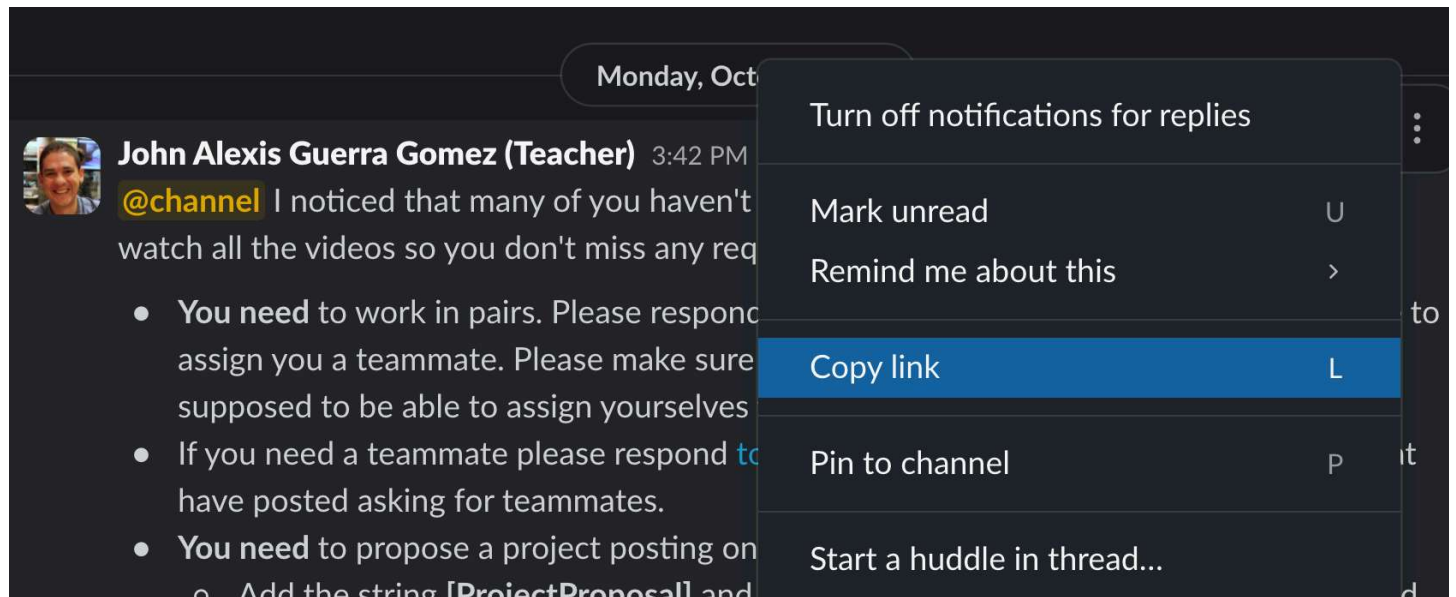

SUBMISSION

I'm putting the deadline of 24hrs to give you a sense of urgency because you are already late proposing your projects.

Please submit a link to your slack post on #project proposing your project, something like:

<https://webdev-online-neu.slack.com/archives/C09DCBJP2BU/p1759790564109799> ➡

<https://webdev-online-neu.slack.com/archives/C09DCBJP2BU/p1759790564109799>

The screenshot shows a Slack interface. At the top, a date separator indicates 'Monday, Oct'. Below it is a message from 'John Alexis Guerra Gomez (Teacher)' at '3:42 PM'. The message content starts with '@channel' and says 'I noticed that many of you haven't watch all the videos so you don't miss any req'. Below the text is a bulleted list with three items: '• You need to work in pairs. Please respond assign you a teammate. Please make sure supposed to be able to assign yourselves', '• If you need a teammate please respond to have posted asking for teammates.', and '• You need to propose a project posting on'. A context menu is open over the message, showing options: 'Turn off notifications for replies', 'Mark unread' (with a 'U' icon), 'Remind me about this' (with a '>' icon), 'Copy link' (highlighted in blue with an 'L' icon), 'Pin to channel' (with a 'P' icon), and 'Start a huddle in thread...'. To the right of the menu, parts of other messages are visible, including 'to', 'it', and 'd'.

Also please make sure to create your groups
